

Partner Communication Guidelines

All partners working collaboratively to meet a student's health-related learning needs acknowledge the following:

1. Every parent has the right to contact the teacher and/or therapist directly to inquire about their child's progress and service plan.
2. Existing supervisory/communication protocols of the partners will be used when communicating about SHP service delivery.
3. The teacher(s), therapist(s), assistant(s) and parent(s) involved will develop a communication plan as part of the student's service plan.
